DETAILED ACTION

Response to Amendment

In response to applicant's amendment filed 4/21/03, claims 1-7 and 9 have been amended; claim 8 canceled; and claim 14 added. Claims 1-7, 9-14 are pending with claims 11-13 being withdrawn from further consideration.

Response to Arguments

1. Applicant's arguments with respect to claims 1-7, 10, 14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7, and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Yu et al (6,373,875 B1). Yu et al discloses the claimed invention. Note for example figure 2a which shows a semiconductor body (100), an active region (102-106) with ridge waveguide with dimensionally unconstricted end sections, and a metallization layer (118) over the ridge and semiconductor body, and means (214a, 214b, 214c) for limiting injection of carriers, providing at least one unpumped end section.

Regarding the thickness and material of the means (214a, 214b, 214c), see col. 6 lines 15-30.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yu et al (6,373,875 B1). Yu et al discloses the claimed invention except for the active region being AlGaAs/InGaAs. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the active region being AlGaAs/InGaAs, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

6. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The cited prior art do not teach or fairly suggest a laser diode, comprising, along with all the other claimed features, the isolation layer's lateral extension being wider than the laser's waveguide ridge, but smaller than the metallization's lateral

extension and the active region with ridge waveguide with dimensionally unconstricted end sections (see applicant's remarks on page 4 the second paragraph, under the second section labeled "II. REJECTION OF CLAIMS 1, 3-5 AND 8 ..." for the definition of dimensionally unconstricted, as claimed).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
